

Precise.

Lap instruments for every budget

Precise instruments were designed with the simplicity of first generation laparoscopic instrumentation, yet with the innovations of third generation equipment. In other words, they are sophisticated AND easy to use. With an irrigation port for thorough and effective cleaning, and no parts to assemble or lose, these instruments were made for **reprocessing ease**. The **precise action** of the jaws offer excellent tactile feedback and the **large rotator** allows for precise positioning.

Economically, you won't find laparoscopic instrumentation that better fits the demands of conventional standards and your budget. With **four times the savings** compared to disposable laparoscopic instrumentation, and the durability necessary for repetitious use, you'll find it hard to dispute the **value** of **Precise** instruments. **Precise** laparoscopic instrumentation are instruments for every budget. Order yours today!

- 1st generation simplicity
- 3rd generation innovation
- Large rotator
- Irrigation port
- Color coded rings, *no messy tape needed*
- Durability
- Affordable price
- Reprocessing ease
- No parts to assemble or lose
- 4x the savings of disposables
- Precise jaw action
- Excellent tactile feedback
- 10 popular jaw patterns
- Reduced lead time
- Highest quality German stainless steel jaws

Interchangeable color coded rings
